

Right Start 4 KidsSM

The right start for healthy smiles!

Right Start 4 Kids (RS4K)

When kids 12 years old or younger visit a Delta Dental network dentist, the **RS4K benefits pay 100%¹ for all covered services under their Delta Dental plan.** These services include:

- Cleanings, exams, X-rays, fluoride treatments, and sealants
- Fillings
- Crowns and tooth removal

Also, there are no deductibles or waiting periods for any covered services. And your dental plan's annual maximum still applies.

Regular dental care for kids is crucial for promoting good oral health, preventing cavities and gum disease. It also helps establish healthy habits and a positive attitude towards dental care that can last a lifetime.

Starting July 1, 2023, Delta Dental of Arkansas is adding Right Start 4 Kids (RS4K) to our Delta 1000, 1500, 2000, and 2500 dental plans for small businesses. RS4K is expanded benefit coverage to help employees, who have enrolled in your dental plan, take care of their children's oral health. RS4K is for kids 12 years of age and younger who are covered on your Delta Dental plan.

RS4K eliminates deductibles and co-insurance amounts your employees are used to paying for check-ups, exams, X-rays, sealants, fillings, crowns — all covered services for kids (except orthodontics) when they see a Delta Dental network dentist.²

1. Right Start 4 Kids benefits are subject to limitations, exclusions and your plan's annual maximum. Check your certificate of coverage for details.

2. Orthodontic services (braces) are available but are not eligible for 100% coverage under Right Start 4 Kids. When an out-of-network dentist is seen, coverage levels will be reduced.
