

## Amplifon Hearing Health Care Discount

# Listen Up!

Your ears could be trying to tell you something.

### **40 million Americans have hearing loss<sup>1</sup>**

Hearing loss affects people of all ages. In fact, about 12% of the U.S. working population has hearing difficulty.

Stay sharp, happy, safe, and productive — don't wait to treat your hearing loss.

### **What causes hearing loss?**

Hearing loss is caused by temporary obstructions in the outer or middle ear or permanent damage to the tiny hairs in the inner ear. Common causes of damage include exposure to noise, aging, other health conditions, and certain medications.

### **When should I get my hearing checked?**

Hearing loss can come on so gradually that you may not even notice it's happening. In general, you should have your hearing screened every 3 to 5 years, and tested annually if you are over the age of 50 or experiencing any of the following:

- Consistent exposure to loud noises
- Difficulty understanding in noisy environments or in groups
- Hearing mumbling or feeling as though people are not speaking clearly
- Ringing in your ears

# Your Amplifon Hearing Program
